1. Reviewed the protocols and the responsibilities of school council members. Stay positive, respectful of others and start/end meetings on time. We want to be able to control the narrative about Blackwell.

2. Reviewed Milestones testing from the 20-21 SY. The data is disappointing we are comparable to similar schools with our reading data, but not in math. We are considerably lower in overall math proficiency (compared to Nicholson and Belles Ferry). Blackwell Admin has decided to create a W.I.N. period. This is a period carved out first thing in the morning to help with the learning gaps that exist in math.

3. The school culture delicate due to COVID protocols. Due to the new CCSD guideline and because we back to capacity in the building, if there is a COVID case in the class, the entire class will be considered close contact. While the class is quarantined at home, they will learn remotely through CTLS.

4. Homework for the group: Please think of ways to get parents plugged into the academic home to school connection. We need support from families to help fill in gaps in learning (standards).
