Purpose:
Students have the option to create groups for their assignments in the My Class Assignments tab. This feature allows students to organize their assignments in any way they would like. This does not impact assignment status and is only visible to the student.

Navigation:
1. Select a class under the My Classes left navigation tab.
2. Click Access My Classroom Assignments to see all assignments for that class.
3. Click +Create Group to create and name the group.
4. Once the group has been created, students can drag assignments into the group.
5. To remove assignments from inside a group, click the X button in the title of the assignment tile. Users can also delete a group by clicking the trash can icon in the group.
