Purpose:
Student responses in Digital Classroom assignments will now automatically be saved when a student has an active cursor in a response window. If a student clicks away from the response field anything that has been entered will automatically be saved as well. In the classroom grading grid, if a student saves their work but does not submit, the assignment will show as In Progress.

Navigation (Student view):
1. Navigate to the assignment either through the student dashboard My Classroom Assignments or the My Class Assignments tab in the left navigation of the Student Portal.
2. Open the desired assignment. If this is the first time accessing the assignment, or there is no response yet, the title of the assignment will show in a purple band.
3. When a student begins to enter text, the assignment will be automatically saved and the assignment title bar will turn to green to signify that the assignment is in the in progress phase.
