Overview of Default/Custom Student Homepage

Purpose:
You now have the option to view the homepage in two different ways. You can still customize the widgets and layout, but there is now an optional Default view. This view is not customizable, but does give you quick access to each of the widgets on the homepage.

Navigation
1. Login to CTLS. At the top of the home page you will notice two choices, Default and Custom. Whatever you chose last will be the option that shows.
2. Click Default to see the new scrolling option.
3. On the left side of the screen you will notice the links to each widget. When you click one it will automatically take you to that part of the page.
4. Click Go to top to return to the top of the page.

Please note: Whether you choose Default or Custom, the last one you chose will be saved the next time you login to CTLS.
