School Response: In developing this plan the school administrative and instructional support staff gathered and desegregated school wide data. This data was integrated into a professional learning presentation in which teachers, staff, other school leaders, paraprofessionals, specialized instructional support personnel, parents, community partners, and other stakeholders could participate in collaboration of the Comprehensive Needs Assessment. This leadership team reviewed and discussed current data, goals from the School Improvement Plan and reflected on this information. The team further determined the root causes and prioritized needs for the next school year.

**Norton Park Elementary-** Professional development will be provided based on the features of this plan and the structure of Cobb Collaborative Communities as described below. It will be focused providing teachers with ongoing support through monthly PLs, peer observations and feedback, classroom support to follow professional development and weekly collaborative meetings. This will ensure we remain data driven and focused as we continue to meet students needs and progress them forward in academic achievement. Professional learning opportunities will be focused, reflective, and coherent. New Teachers will be supported through new teacher's academy at the local school level. Monthly meetings, mentor/mentee pairings, focused PL sessions, school culture, community involvement and relationship building will continue to be a part of recruiting and retaining effective teachers throughout the school year.

**Cobb Collaborative Communities-** Focused professional development based on high standards of teaching and learning is essential to improving teaching and increasing student achievement. It must be focused on what teachers district-wide and in the individual schools need to know and be able to do for their students. Ultimately, professional development should build "professional communities" committed to higher student learning. Continuous learning opportunities that are focused, reflective, and coherent are essential. The following are research-based practices in professional development that support career-long development of teaching and student learning:

- Provide on-going learning opportunities for all
- Improve teaching and learning
- Target student outcomes and goals of schools and districts
- Set time aside to allow teachers to implement new techniques learned and to plan collaboratively
- Establish study groups (e.g., book studies, professional magazine articles, etc)
- Involve all teachers including, Special Education, ESOL, paraprofessionals and specialists (music, art, science, math and physical education)
