MAKING YOUR CHILD A SUPER READER

EVERY CHILD IS A SUPER READER :
7 STRENGTHS TO OPEN A WORLD OF POSSIBILITIES

BY PAM ALLYN AND ERNEST MORRELL

STRENGTH 2 CURIOUSITY

Curiosity leads to invention and innovation!

Children are naturally hungry for information as they ask "Why? Why? Why?". Celebrate the journey with your child by springing off books/literature to:

- conduct a search for information related to the setting of the book
- travel to destination mentioned in a book or use the internet to take a virtual tour
- create a "wonder wall" of questions that arise when reading-then take time to research the answers
- encourage your child to read informational books about new or unfamiliar topics
- have your child keep a journal of wonderings and create a story based on his/her questions
- engage in meaningful book discussions at home

Reading Inventory (RI), Foundation Reading Assessment (FRA), and Math Inventory (MI) What are they and how are they used?

The **Reading Inventory (RI)** is a computer-adaptive screener that Cobb County School District uses to provide immediate, actionable data on students' reading levels and growth from kindergarten to 9th grade. Students are screened in grades K-9 three times per school year to assist teachers with monitoring growth and personalizing instruction.

The Foundational Reading Assessment (FRA)is a subtest of the Reading Inventory which helps teachers monitor K-2 students' development of foundational reading skills and indicates readiness for the Reading Inventory. Once a student receives a score of at least 49 on the FRA, they will move on to take the Reading Inventory.

Math Inventory (MI)

The Math Inventory (MI) is a computer-adaptive screener that measures students' readiness for math instruction. MI tracks progress from kindergarten through Algebra II. Cobb County School District screens all students in grades K-9 three times per school year to assist teachers with personalizing instruction for their students.
