

PROCEDURES FOR EOC SCORES ON HIGH SCHOOL TRANSCRIPTS FOR THE 2020-2021 SCHOOL YEAR

The following procedures for End of Course (EOC) assessments only apply for the current school year.

Students who do not take the EOC will not have the EOC score entered on the high-school transcript.

Students who take the EOC will have the EOC score entered on the transcript.

Students who do not take the EOC will receive a zero for the EOC score.

Students in EOC courses in 2020-2021 will have the EOC score weighted 0.01% in the calculation of the course grade. In December 2020, the State Board of Education approved a weight of 0.01% for the EOC score for the current school year.

Students in EOC courses in the fall semester that had a zero entered on the transcript for the EOC score will have the zero removed from the transcript.

Middle-School Students in High-School Courses

Middle-school students in Algebra I and other high-school EOC courses the current school year will have these same procedures applied to the EOC score and high-school transcript.

Beginning this school year, high-school Physical Science is no longer an EOC course because Georgia removed that requirement to reduce state-mandated testing.

All eight-grade students are mandated to take a state assessment in science. Students in Physical Science will take the EOC instead of the End-of-Grade assessment in science, because the EOC aligns with the Physical Science course standards. However, that EOC score will not be calculated in the course grade or entered on the high-school transcript.
